Please visit our website, [www.quakerfunds.com](http://www.quakerfunds.com), for performance of all available share classes updated monthly.

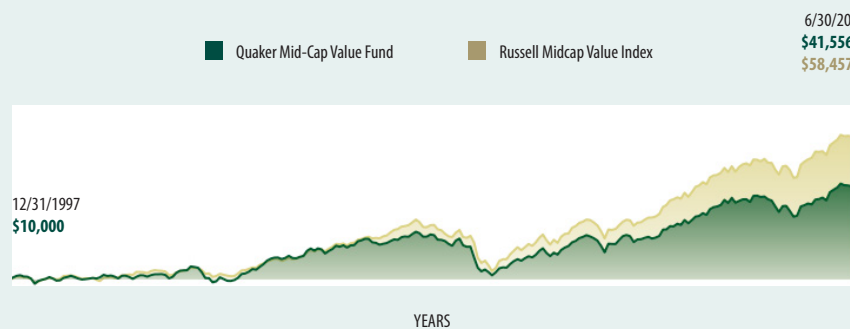

Performance data shown before sales charges does not reflect the deduction of the sales load. Short term performance, in particular, is not a good indication of a fund's future performance. Performance data shown after sales charges reflects the Class A maximum sales charge of 5.50%.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end is available at [www.quakerfunds.com](http://www.quakerfunds.com) or by calling us toll free at 800.220.8888.

The Russell MidCap® Value Index is a widely recognized, unmanaged index of companies included in the Russell 1000® Index with current market capitalizations between \$45 million and \$16.7 billion. You cannot invest directly in an index.

## GROWTH OF \$10,000

CLASS A

This chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund on inception. It assumes reinvestment of dividends and capital gains, but does not reflect the effect of any applicable sales charge. This chart does not imply future performance.

## INVESTMENT STYLE

- Portfolio typically holds 35 to 45 stocks.
- Manager searches for stocks believed to have attractive fundamental valuations with market capitalizations within the range of the Russell Mid Cap Value Index.
- Stock selection focused on undervalued companies with strong sales and earnings momentum with high profitability and rising earnings expectations.

### SUB-ADVISER

KENNEDY CAPITAL MANAGEMENT  
ST. LOUIS, MO

**Frank Latuda, Jr., CFA**  
Fund Manager Since 01/01/2009

### KEY DEFINITIONS

**Price/Earnings Ratio:** The Price/Earnings Ratio or P/E Ratio is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations.

**Price/Book Ratio:** The price/book (P/B) ratio of a fund is the weighted average of the price/book ratios of all the stocks in a fund's portfolio.

**Price/Sales Ratio:** A stock's current price divided by the company's trailing 12-month sales per share.

**Long-Term Earnings:** The long-term projected earnings growth rate for a stock is the average of the available third-party analysts' estimates for three- to five-year EPS growth.

**Historical Earnings:** The historical earnings growth rate for an investment is a measure of how the equity earnings per share (EPS) have grown over the last five years.

**Sales Growth:** The percent increase or decrease in sales over a given period of time.

**Book Value Growth:** The weighted average of the growth rates in book value for each stock in the fund's portfolio.

The Fund invests in companies that appear to be "undervalued" in the marketplace (i.e. trading at prices below the company's true worth). If the Fund's perceptions of value are wrong, the securities purchased may not perform as expected, reducing the Fund's return. The Fund also invests in companies with medium market capitalizations (generally from \$1.5 to \$6 billion). Their stock prices often react more strongly to changes in the marketplace and can be more volatile.

Fund holdings, sector allocations, and asset allocations are subject to change and are not recommendations to buy or sell any security.

**Mutual fund investing involves risk including the possible loss of principal.**

**Consider a fund's investment objectives, risks, charges, and expenses carefully before investing. The Statutory, and where available, the Summary Prospectuses contain this and other important information and are available for download at [www.quakerfunds.com](http://www.quakerfunds.com) or by calling 800.220.8888. Read carefully before investing.**
